

Only trust the Original!

In the HUCK Bird's Nest children play on a close-meshed chain-link mat. The risk of injury is therefore extremely slim. The "chicks" sit on a smooth and gently rounded floor - like their feathered friends in a Bird's Nest.

Of course, there are specific provisions in the play equipment standard as regards padding, which the HUCK bird's nest clearly exceeds.

Another criterion of quality: The extra strong abrasion protection for connecting pieces subjected to great stresses and for suspension chains. Extremely weatherproof and cold-resistant sleeve tubing for the HUCK suspension chains provides optimal protection with regular use - that's why our Bird's Nest is so well-loved!

Even maintenance is child's play: The play equipment can easily be repaired once assembled. All assembled materials come with a 5-year guarantee and with proper care and maintenance the children can play happily on their play equipment for a long time.

HUCK's standard Bird's Nest has a blue wrapping rope - it also come in a choice of green, black, red and natural hemp.

Our experience and our warranty guarantee quality at the highest level - that's HUCK "Made in Germany"!

The "Bird's Nest" name has been a Registered brand name of HUCK-Seiltechnik GmbH for years.

Conclusion: Only trust the original! Because only the HUCK Bird's Nest combines happiness through play, durability and safety.

Use to your advantage the all Original HUCK Bird's Nest swing!

Safety and high play value

- ⊕ Close-meshed chain-link mat
- ⊕ Protection against sliding through or arms or legs slipping through
- ⊕ Nest-shaped base
- ⊕ Extra-thick padding

Premium quality

- ⊕ Additional anti-abrasion protection on Connecting parts
- ⊕ Suspension chains with highest quality.
- ⊕ Weather-resistance and cold-proof
- ⊕ Proof sleeve tubing
- ⊕ 5-year guarantee on all materials

Extremely easy maintenance

- ⊕ Repairs can be made to the nest mat onsite
- ⊕ Replacement parts readily available
- ⊕ HUCK Service with return and redeliveryservice

The benefits of chain-link mats with steel rope chain connection that have been tried and tested 100 times over worldwide can also be seen directly on the used play equipment:

- ⊕ The chain-link base of our Original HUCK Bird's Nest from 2002 shows no sign of damage whatsoever to the plastic links, steel rope or chains

- ⊖ The net base of a nest swing from 2013 has already worn away on its surface so that the knot connection is only held in place by single rope strands. Also, the steel core is already completely open in places and shows signs of rust

For durable and long-lasting swinging experience: All HUCK nest swings now come with extra strong anti-abrasion protection at the connecting points subjected to stress on the suspension chains for the nest basket and the crossover points on the suspension chains.
